## Hard skills

- Node.js, Express
- Next.js, React
- JavaScript, TypeScript, HTML, CSS
- Data Analysis & Visualization
- Data Cleaning & Transformation

# ALBERTO JESUS PRADA

## PARMERA

Software Developer

## About me

I build full-stack web applications with React, Next.js and Node.js, driven by curiosity and a love for solving real problems with code. Alongside my role as a data analyst, I take on freelance development projects where I get to design and ship software end to end for real clients.

## Education

### 2024 - 2028 | BRIGHAM YOUNG UNIVERSITY IDAHO

*BCs Software Development*

*Concen - Web Development*

Developing skills in software and web development, programming languages, database management, and collaborative project work.

### 2023 - 2024 | BYU - PATHWAY

*Academic Preparation Program*

University level learning, critical thinking, academic research, and preparation for professional and technical careers.

### 2012 - 2018 | U.E COLEGIO DON BOSCO

## Work experience

### 2025 - ACTUAL | ODDSGATE

#### Data Analyst

- Conducted client facing demos of the back office platform, walking stakeholders through key functionalities and showcasing how the tool supported their operations.
- Identified and resolved data discrepancies across sources through cross validation checks, improving report reliability and preventing errors in business decisions.
- Designed and delivered recurring reports for business teams, translating complex data into actionable insights that supported strategic decision making at executive level.
- Collaborated cross functionally with multiple teams and departments in a fast paced, dynamic environment, adapting priorities and deliverables to shifting business needs.

### 2020 - 2025 | ACCENTURE

#### Trust & Safety Representative

- Reviewed and moderated high volumes of digital content against platform policies, maintaining accuracy above team KPI benchmarks.
- Mentored new team members, shortening onboarding ramp up and consistently lifting market KPI performance.
- Identified recurring content policy gaps and proposed process refinements adopted across the team.
